WELCOME & INTRO

INDIGENOUS ENGINEERING

ALANA ROSS
alana.ross@usask.ca
MEET YOUR MODERATOR AND YOUR ALUMNI RELATIONS COORDINATOR

CARLENE DEUTSCHER
carlene.deutscher@usask.ca
Today is all learning about the supports and resources you have available to you as a USask Engineering student.

**STUDENT SUPPORTS IN ENGINEERING & USASK**

**SUMMER TOP UP'S**

**FACILITATED STUDY SESSION**

**USASK LEARNING COMMUNITIES**

**SCHOLARSHIPS & BURSARIES**
ENGINEERING STUDENT CENTRE
We are here to help throughout your entire degree
Don’t be shy! Book an appointment with an academic advisor - it's free and we are here to help year round!

USASK RESOURCES
Be sure to visit www.students.usask.ca to see all the resources available to students

Mental and Physical Health
This summer, the College of Engineering will offer micro-courses, called summer top ups. If your semester was cut short or you need to brush up on key concepts, these summer top ups in physics, chemistry and math will make sure you have the foundation you need for first-year engineering.
FACILITATED STUDY SESSIONS

WHAT ARE THEY?
Facilitated Study Sessions allow you to discuss and clarify concepts with professors, upper-year students and your peers. It’s a great place to practice problems and prepare for exams, and get help to develop effective study strategies.

FACILITATED STUDY SESSIONS
Held Thursdays
5:30-7:30 PM
Engineering Library
(online platform to be launched in September)

Come as you are - all engineering students welcome
A Learning Community (LC) is a group of 30 students from the same college who share a common schedule.

What happens in an LC?
Engineering LC students meet weekly in an LC Hour with two Peer Mentors. These upper year university students help students in the LC learn more about their program, how to study and how to get academic help.

How can you join a Learning Community?
TAKE THE TIME AND APPLY FOR
SCHOLARSHIPS & BURSARIES

During your first year, it's important to remember two important dates:

**OCT 1**
Deadline for most bursaries offered by the university. Bursaries are given to students in financial need, though some bursaries may have additional criteria.

**JUNE 1**
Deadline for a large number of scholarships on campus. Scholarships are normally granted for academic achievement or leadership experiences.

We encourage students to also apply for awards from other sources, such as clubs and associations. External awards are offered by agencies, governments or other organizations outside of USask.
When you register on Saturday, June 13, 2020, the Engineering Student Centre will have people on call to help you if needed.
